LMFCR0003B	Carry out measurements and calculations 20								
LMFFM2001B	Use furniture making hand and power tools 40								
<i>Allocation of nominal hours:</i>									

Notes:

- You need to select three tasks to cover all units of competency. Reading down the columns, the ticks indicate which task each unit of competency has been assigned to.
- You may select two tasks of the same type, but not three. For example, a student could complete two Work Projects but could not do a third Work Project.
- The assessment of a unit of competency cannot be split between two tasks.
- Decide on task allocation after considering the units of competency and the scoring criteria for each task. This will help you to choose the task type that gives students most scope for demonstrating their achievement of the units of competency.
- The allocation of nominal hours across tasks should be as equally weighted as possible.
- No task for VCE VET Furnishing may account for more than 120 total nominal hours in the student's Units 3 and 4 sequence. A task accounting for more than 120 hours will not be acceptable.**
- The VASS data entry number appears on the VASS screen where the Assessment Plan is entered. These numbers help identify the task against which the results are to be entered.
- Specific advice for VCE VET Furnishing: Product Task Type: The execution of the plan to produce the Product may be split into a number of steps, each of which should take no more than 15 hours. There should be no more than three steps in the process to achieve the satisfactory Product. The steps themselves are not to be assessed discretely. The Product must be assessed holistically. The assessor may take up to one hour to assess the Product. This will include inspection of the Product and an interview with the student.
