Question 11  Tick the box next to the question you are answering.

a. What determines the degree of offensiveness is a set of social attitudes or conventions, and these can vary hugely from group to group and even between individuals of the same group . . . Word meanings and their associations vary continuously. We have to bear in mind the relationship between the speaker and the audience, the setting, and the subject matter; change any one factor and the language may also have to change.
  (Kate Burridge, Gift of the Gob)

b. The quickest way to relax an audience is to use the f-word. Everyone laughs. It’s a way of saying: we’re all grown-ups here. I’m real, just like you . . . Swearing together can be a way of asserting a cultural cohesion; and Australians are famous for our ability to meet and instantly insult each other as a way of breaking the ice.
  (Kate Holden, The Age, 27 November 2010, Colourful and cultured language you can swear by)

c. The world’s crazy! No more Noddy and Big Ears, no more drunken sailor, no more kookaburra having a gay life, no more golliwogs. What sort of sick, perverted people see the offence in these innocent things? Once again, it’s ‘big brother’ deciding that these things are no good for us and that we aren’t smart enough to see them in the context intended. We had more freedom of speech fifty years ago than we have now – much more.

| a. | Australia’s multicultural policy embraces our shared values and cultural traditions. It also allows those who choose to call Australia home the right to practise and share in their cultural traditions and languages within the law and free from discrimination.  
(Department of Immigration website) |
| b. | Different languages and cultures are part of Australia’s multicultural society and need to be incorporated in mutually beneficial ways. The cultures of Aboriginal peoples and Torres Strait Islanders are a rich and important part of this Australian heritage.  
(Bullying: No Way website) |
| c. | Two Australians can grow up side by side, go to the same schools, do the same job, but end up speaking English using different words, different grammar and with different accents.  
(Convictcreations website) |
| d. | Today there is a growing trend for Australian-born children of migrants from non-English speaking backgrounds to embrace their cultural heritage and express their niche identities by using new Australian Ethnocultural dialects. They contain features of Standard Australian English combined with some non-English language features.

Question 13  Tick the box next to the question you are answering.

a. . . . the blogosphere is saturated with people and opinions ‘of such limited intellectual value as to be barely discernible from massive ignorance’ . . . when this ignorance is published by a major newspaper, or on a blog hosted by the paper, the danger is multiplied.
   (Irfan Yusuf, The Age, 23 September 2010, Reckless racial stereotyping by those who know little)

b. . . . great speeches can make a difference by helping unite the world . . . console its grief, save it from evil, and just simply entertain us.
   (Dennis Glover, The Age, 28 November 2010, Power and Persuasion)

c. You can’t beat a handwritten letter because it means the sender made the extra effort . . . Internet communication is brilliant but rue the day if ever the personal note goes into mothballs.
   (Lawrence Money, The Age, 17 January 2011)

d. . . . the fact remains that modern society makes available to its members two very different systems of communication, each of which has developed to fulfil a particular set of communicative needs, and now offers capabilities of expression denied to the other. Writing cannot substitute for speech, nor speech for writing, without serious disservice being done to each.
