The larger store will require a major upgrade of the electrical system. The business currently uses 25000 units (kilowatt hours) of electricity per year and this is expected to double. Cost of electricity from the electricity grid is budgeted to be 25 cents per unit (kilowatt hour) plus an administration supply charge of $\$ 500$ (plus GST) per year.
- Option 2 - Install a solar panel system, including battery storage, for $\$ 36000$ (plus GST), which would meet $85 \%$ of the business's electricity needs.
