Some students did not read each text carefully to comprehend the content and did not spend sufficient time analysing the questions. This led to misinterpretation and irrelevant responses. Text 9
Question 9

In Section 2, Part B, students were asked to write a persuasive letter of approximately 150 words in Persian. Students needed to include the information given in the text of the advertisement to write a letter to their grandparents to encourage them to purchase a new unit.

Most responses were well written and addressed most of the main points. Some responses lacked the correct conventions and style for the text type (a letter): introduction, conclusion, body, punctuation, opening, closing and date.
Section 3 – Writing in Persian

In this section students had to choose one of three questions and write their answers in Persian. Generally students responded well; however, some responses did not comply with the required kind of writing and text type. This was evident especially in responses to Question 11, where responses needed to be a personal diary entry.

Question 10
Students were required to write an informative text of a speech for an international conference on youth and culture. Their speech needed to be about how Persian-speaking communities can preserve their culture in Australia.

Question 11
Students were required to write a personal diary entry in which they talked about their choice of study at university and future career, which were both different from what their parents would like them to do.

Question 12
Students needed to imagine that they were a precious, ancient object and write a story for a Persian short-story competition.
