TEST INFORMATION

- This test contains 30 questions and can be administered to individuals, small groups or to a whole class of students.
- Practice questions are included at the start of the test to help students become familiar with the different types of responses that are required in the test. Teachers should work through the practice questions with students prior to starting the test.
- An answer sheet, results translation table and information on interpreting results are included.
- **Time allocation**
  - Introduction and practice questions: 5 – 10 minutes
  - Test time: 40 minutes

TEST ADMINISTRATION

- Make sure that each student has a pencil and an eraser.
- Hand out the test booklets to students, making sure that the front cover is facing them.
- Read through the instructions on the front cover of the test with the students.
- Work through the practice questions with the students, ensuring that the students pay attention to the type of response that is required for each question.
### VELS 4.0 – 4.5 Mathematics: Number

**Teacher Section: 2310 VELS 4.0 – 4.5 Number Progress Test ii/iv**
This Progress Test will provide only an estimated Victorian Essential Learning Standards (VELS) Progression Point. It is intended to complement and confirm other classroom assessments and teacher judgments, and should not be used in isolation.

This test is designed to measure outcomes over a limited ability range only.

Results are limited to the expected VELS range for a given year level.

It is not possible to give a reliable ability estimate for students with zero or perfect scores. It is recommended that you administer a test at a lower or higher level in these cases.

Ability estimates for students who achieve close to zero or perfect scores will not be as accurate as those for students with results clearly within the range of the test. You may wish to administer a test at a lower or higher level to confirm results for these students.

Each Progression Point covers a wide range of learning outcomes. A student’s estimated ability is influenced by a result being at or near the bottom or at or near the top of the Progression Point. For example, an estimated Progression Point will be the same for a student with 3 correct answers and a student with 10 correct answers. However, these two students have demonstrated different ability levels.

Further information about interpreting results can be found on the VCAA website at: http://www.aimonline.vic.edu/doc/ODI.pdf

Specific information about the learning outcomes for the Victorian Essential Learning Standards is available on the VELS website at: http://vels.vcaa.vic.edu.au
This test targets outcomes at VELS 4.0 to 4.5. For more information about interpreting results download the Interpreting On Demand Reports document at: http://www.aimonline.vic.edu.au/doc/ODI.pdf

STUDENT DETAILS

STUDENT’S NAME ..........................................................................................................................................................................................................

DATE ........................................................................................................................................................................................................................................

CLASS ......................................................................................................................................................................................................................................

STUDENT INSTRUCTIONS

1. Print your name, class and date above.
2. You have 40 minutes to finish the test.
3. You must do your own work.
4. Do not speak to other students during the test.
5. Raise your hand if you need to speak to the teacher.
6. If you make a mistake, rub it out completely and try again.
7. If a question is too hard, do the next one. You can go back to unanswered questions at the end if you have time.
8. If you have finished the test early, spend time checking your answers before you return the book to your teacher.
This is a blank page
Practice Question 1

$10 \times 4 = \boxed{\phantom{0}}$

Shade one bubble

10 \hspace{1cm} 20 \hspace{1cm} 30 \hspace{1cm} 40

Practice Question 2

$4 \div 2 = \boxed{\phantom{}$

Write your answer in the box

Practice Question 3

Write the following numbers from smallest value to greatest value in the boxes below.

$2 \hspace{1cm} 3 \hspace{1cm} 1$

smallest value \hspace{1cm} greatest value
1. \(0.76 - 0.5 = \) 

- 0.21
- 0.26
- 0.81
- 0.86

2. Which one of the following is true?

- \(\frac{1}{2} = 20\%\)
- \(\frac{1}{3} = 0.30\%\)
- \(\frac{1}{4} = 25\%\)
- \(\frac{1}{6} = 6.6\%\)

3. Tony has finished 80\% of his homework.

What fraction of his homework has he finished?

- \(\frac{8}{100}\)
- \(\frac{1}{80}\)
- \(\frac{8}{10}\)
- \(\frac{1}{8}\)

4. The arrow on the number line is pointing to

- \(-4\)
- \(0\)
- 4

The bubble to shade is

- \(-3\)
- \(-2\)
- \(-1\)
- \(-\frac{1}{2}\)
5. \(2.6 \times 3 = \) [Write your answer in the box]

6. \(12 \times 32 = \)
   - 362
   - 364
   - 384
   - 386
   [Shade one bubble]

7. Julia has $150. She spends \(\frac{1}{3}\) of this on a new jumper and a further $40 on a new pair of shoes.
   The amount of money she has left is
   - $40
   - $50
   - $60
   - $70
   [Shade one bubble]

8. \(1.82 - 0.53 = \) [Write your answer in the box]

9. \(107 \times 38\) is closest to
   - 40 000
   - 4000
   - 3000
   - 300
   [Shade one bubble]
10. 3, 5, 7, 11, [?]
What is the next prime number?
13 14 15 17

11. $4^2 =$
2 6 8 16

12. 50% of a number is 24
What is the number?

13. Match these fractions with the letters shown on the number line.
Write your answer in the boxes

14. The lowest common multiple of 4 and 6 is
46 24 12 2
Shade one bubble
15. What is the next number in this number pattern?

\[
\begin{array}{cccc}
18 & 9 & 3 & 1 \\
\circ & \circ & \circ & \circ \\
\end{array}
\]

16. \[
\sqrt{\frac{16}{81}} =
\]

\[
\begin{array}{cccc}
4 & 8 & 4 & 8 \\
3 & 3 & 9 & 9 \\
\circ & \circ & \circ & \circ \\
\end{array}
\]

17. \[
\frac{5}{12} - \frac{1}{12} =
\]

\[
\begin{array}{cccc}
\frac{1}{2} & \frac{1}{3} & \frac{1}{4} & \frac{1}{6} \\
\circ & \circ & \circ & \circ \\
\end{array}
\]

18. \[
3 + \frac{3}{4} =
\]

\[
\begin{array}{cccc}
3.25 & 3.34 & 3.60 & 3.75 \\
\circ & \circ & \circ & \circ \\
\end{array}
\]

19. Which set contains only factors of 54?

\[
\begin{array}{cccc}
9, 6, 4, 1 \\
8, 6, 3, 2 \\
9, 6, 3, 2 \\
8, 7, 4, 2 \\
\circ & \circ & \circ & \circ \\
\end{array}
\]
20. \[ 3618 \div 9 = \]
- 42
- 42 remainder 8
- 402
- 402 remainder 2

21. Patrick has five $1 coins and three $2 coins. The ratio of the number of $1 coins to the number of $2 coins that Patrick has is
- 3 : 8
- 5 : 3
- 5 : 8
- 5 : 6

22. Which one of the following numbers has the greatest value?
- 0.099
- 0.99
- 0.789
- 0.87

23. \[ \sqrt{60} \] is between
- 5 and 6
- 6 and 7
- 7 and 8
- 8 and 9
24. $2.9$ million is shared equally between $4$ lottery winners. How much will each receive?

- $72,000$
- $72,500$
- $720,000$
- $725,000$

25. \[ \frac{1}{5} + \frac{7}{10} = \]

\[
\begin{array}{cccc}
\frac{8}{15} & \frac{6}{5} & \frac{6}{10} & \frac{8}{10} & \frac{9}{10} \\
\end{array}
\]

26. \[ \frac{2}{3} \text{ written in decimal form is} \]

- $0.2$
- $0.3$
- $0.4$
- $0.6$

27. \[ \frac{3}{10} \div \frac{1}{5} = \]

\[
\begin{array}{cccc}
\frac{3}{2} & \frac{2}{3} & \frac{3}{50} & \frac{50}{3} \\
\end{array}
\]

28. Written as a product of prime factors, $100$ is equal to

- $2^2 \times 5^2$
- $4 \times 5^2$
- $2^4 \times 5$
- $2 \times 5^2$
29. \[4.23 \times 1000 = \]

Write your answer in the box.

30. \[24 \times \frac{1}{3} = \]

Shade one bubble.

6  8  12  72

○  ○  ○  ○
