

Important information for exam supervisors.

In Mac OSX, the practical work folder is copied to the desktop at the start of writing time.

The name of this folder is of the form 12345678a_P, where '12345678a' is the student ID.

After the exam, it is **essential** that this practical work folder is copied to the student folder '12345678a', which will be in the same folder as the exam application, for each student.
