

2017 VCE Indonesian First Language written examination report

General comments

The majority of students were able to complete the questions in Section 1.

In Section 2, synthesising the appropriate information from the two texts seemed difficult for some students. Some students copied information straight from the original texts as their answer. Students are expected to write in their own words in formal Indonesian. Sentences, phrases and correct grammar should be used in all sections. Selection of vocabulary is also important so students are able to vary their sentences.

Specific information

This report provides sample answers or an indication of what answers may have included. Unless otherwise stated, these are not intended to be exemplary or complete responses.

Section 1 – Listening and responding

Writing answers in complete sentences using formal language at times seemed difficult for some students. Students should avoid writing at length about what they have heard in the text; they should be able to rephrase the information in their own words and select the correct answer.
