

2023 VCAA NAPLAN Reporting & Data Service Professional Development

[REGISTER NOW](#)

This year you have a choice of attending a Face-to-Face Workshop or a Webinar. Both will cover the same content. If you are less confident with interpreting NAPLAN data, a face-to-face session may suit you better.

Workshops and Webinars

Unpack reports within the VCAA Data Service and the reports within the SSSR documentation

- Understand how the reports within the **VCAA Data Service** are computed and how they can be used to evaluate your students' and school's performance.
- Understand how and when to use the **Student and School Summary Report (SSSR)**.

Understand the new National Scale, Proficiency Standards, Item Difficulties and the online NAPLAN branched test design

- Understand the new **National Scale** and **Proficiency Standards**.
- Understand **Item Difficulties** and their importance in interpreting reports within the VCAA Data Service, which is paramount to interpreting the online NAPLAN tests.
- Understand the structure of the NAPLAN **online branched test design**.

Interpret your school's data to inform whole school improvement strategies

- Learn how your school's NAPLAN data can be used to **inform teaching and learning** and **inform school policy and program development**.
- Unpack your 2023 NAPLAN data to find **standout areas of strength/weakness** to inform planning for 2024 and beyond.

To gain maximum benefit from a webinar, it is essential that participants plan ahead by testing the WebEx link that will be sent after registering for the session. You may need support from your school technician to ensure your computer/device is ready to use WebEx.

Note: All participants will need to know their school's login details to the VCAA Data Service prior to attending a session.

Target audience

School Leaders, Classroom Teachers
We highly recommend a minimum of two participants per school as it is beneficial to reflect, brainstorm and discuss ideas with colleagues after the session. However, single registrations will be accepted.

Presenters

Philip Holmes-Smith & Emma MacNamara (from SREAMS) are leading authorities on analysing performance data to identify school strengths & weaknesses and set improvement targets. They will guide you through understanding how best to use your 2023 NAPLAN data.

Cost

FREE

When

You can choose to attend either one of the **33 online webinar sessions** OR alternatively, you can attend one of the **32 face-to-face workshops at venues across Victoria**
