INDUSTRY PROJECT	
Description How the evidence is gathered and/or presented	REPORT or PRESENTATION that researches, investigates or problem solves work operations An Industry Project involves completing an investigation and report on an aspect of the industry or work operations.
ASSESSMENT REQUIREMENTS	
Assessment conditions	The assessment is to be conducted as outlined in the unit(s) of competency (UoCs) and cover all requirements of the unit(s). The volume or frequency requirements outlined in the Performance Evidence must be met. The workplace context must be consistent with the Assessment Conditions as outlined in the Assessment Requirements in the UoC.
Activity guidelines	**REPORT/PRESENTATION** This must be an investigation, a report, a proposal or a solution to a problem relevant to the industry and as outlined in the UoC. This would typically involve people engaged in the industry; workplace-specific or industry practices or processes; and/or resources, equipment or materials used by the industry.
	PRESENTATION can be either: a WRITTEN REPORT (2000 words max. – total words must relate to the nominal hours of the UoC(s) being assessed) or an ORAL REPORT or AUDIOVISUAL/VIDEO/INTERACTIVE PRESENTATION (15 minutes max. – total time must relate to the nominal hours of the UoC(s) being assessed)
	SUPPORTING EVIDENCE may be included if required by the UoC(s). For example: • a workplace document or procedure • a business plan or proposal • surveys • screenshots, photos or multimedia • an item or document produced • practical tasks or observation checklist
Evidence for submission	**MUST include:** • COMPLETED REPORT or PRESENTATION Can include SUPPORTING EVIDENCE as required by the UoC(s)
Maximum time allowed	25% of the total nominal hours of the UoC(s) being assessed in this task
Scoring criteria	Application of underpinning knowledge
	Expressing ideas and information
	Planning, organisation and implementation
	Collecting and analysing ideas and information
	Coherence and coverage
