

# Digital Technologies Curriculum – Levels 3 and 4

## Content descriptions

### Digital Systems

### Ways of thinking at Levels 3 and 4

#### Computational thinking

#### Systems thinking

Interactions and interrelationships between components, devices and people

### Data and Information

Recognise different types of data

Image data	Text data
Sound data	Video data
Collected data	Calculations
Files	Line chart

Collect, access and present different types of data

Collaborate	Plan
Privacy	Protocols

Plan, create and communicate ideas and information

### Creating Digital Solutions

Define simple problems

Decision	Define problem
Steps	User input

Develop simple solutions as visual programs

Decision	Solutions
User input	Visual program

Explain how solutions and information systems meet needs

Evaluate classmate's solution	Evaluate own solution
Present data	Survey
